

Cable Rack Displays

These displays were designed with the dealer in mind. Now, cables can easily be displayed without taking up valuable shelf space. Simply hang them off the wall. We have redesigned our headercards so they hold the cable end preventing cables from falling out of their display bags. Dealers can easily stock more applications by stocking Motion Pro cables than if you stocked only OEM cables. Hang these below one of our Motion Pro Banners and let your customers see your commitment to quality products.

18" Cable Rack Display

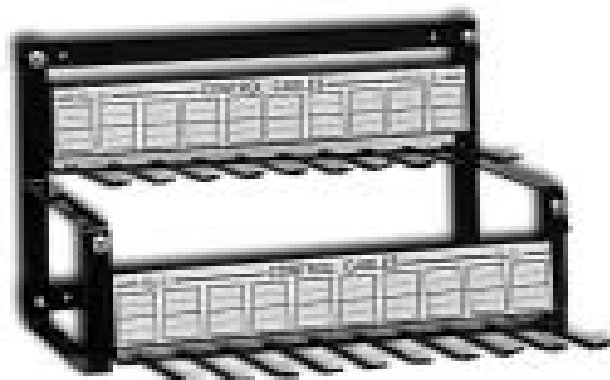

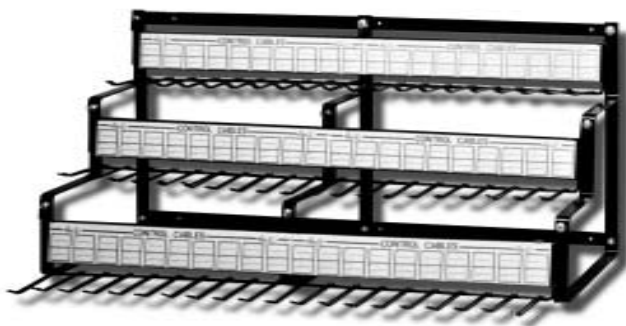

121-01152

- Hold up to 200 cables on wall space of 18" x 11"
- Black epoxy finish
- Kit contains 2 racks, end pieces, hardware and display header

36" Cable Rack Display

121-01153

- Hold up to 500 cables on wall space of 36" x 17", with 14" depth
- White epoxy finish
- Kit contains 3 – 20-slot 36" cable racks, middle and end braces, hardware and display header cards

36" Cable Rack Only

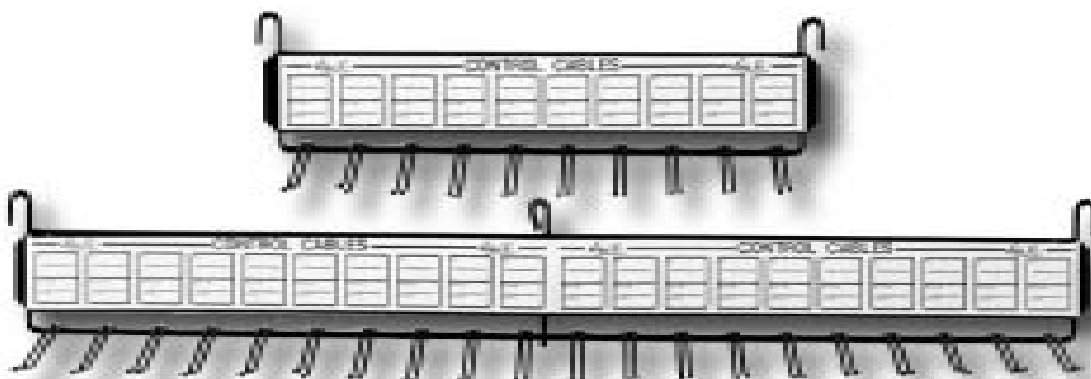

121-01151

- 20-slot cable holding system
- White epoxy finish

18" Cable Rack Only

121-01150

- 10-slot cable holding system.
- Black epoxy finish.

Ray-O-Matic PIR Detector Entrance Alarm and annunciator system

522-05100

High tech passive infra-red detectors have been designed into customer annunciating systems. A curtain of security can now protect any opening. Our small and attractive unit mounts above the door, out of reach and out of mind. The body heat of a person passing through the door will activate the "PIR" detector. People can no longer crawl under or jump over the annunciator system. At last an annunciating system that can truly be thought of as security!

The "IR-51 Ray-O-Matic", is a complete annunciator kit that anyone can install. The system consists of a compact detector unit 2-3/8" wide by 1" deep by 3-3/4" high. It comes with a mounting bracket for locations that may warrant it, a UL approved 12 volt AC transformer, a pleasant-sounding chime, 70 feet of low-voltage wire, simple installation instructions and one-year factory warranty.

The "IR-51 Ray-O-Matic" can be mounted to span a distance of 25 feet even in brilliant sunlight. It is unique because it is a one-piece, low-voltage detector that can be moun over the door. The detector looks for a change of heat in a dual pattern which eliminates false rings from changes in sunlight, car lights, flashes of light, heating systems, etc.

Features:

- *Versatile, undetectable, inexpensive, indispensable
- *Mounts over the door, out of reach
- *No light bulbs to change
- *Invisible detection
- *Cannot be seen from the outside

*Low-voltage meets building and safety codes

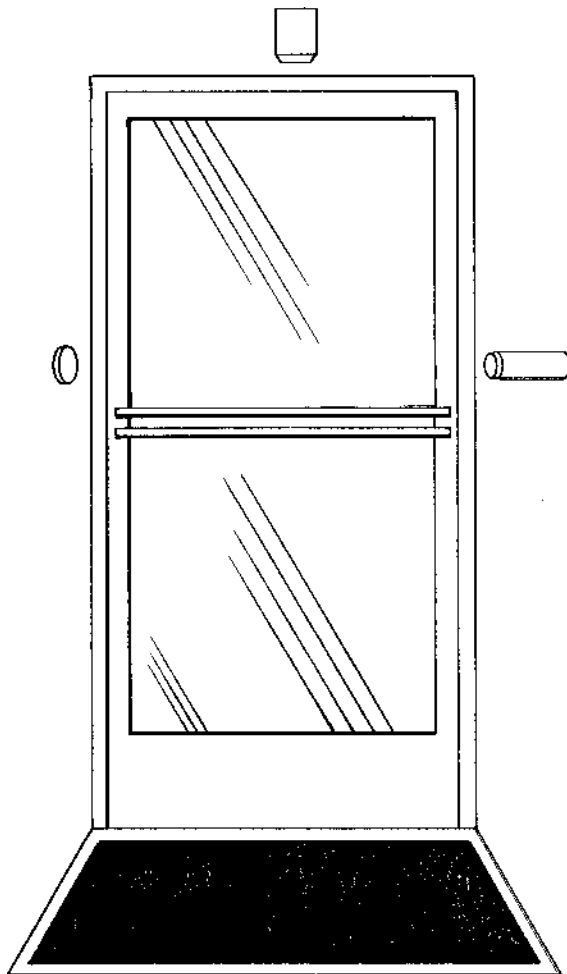

*Safe, UL approved 12-volt power supply

*Performs well in both dim and bright sunlight

*Saves installation casts-install it yourself in minutes

*Full one-year limited warranty

*A quality product, made in the U.S.A. by Snyder.

Mat annunciator kit

522-03610

Mat annunciator kit complete for announcing people entering or leaving your premises. When a person steps on the special mat covered by your entry carpet. A chime is sounded making you aware of their entry. Kit contains 30" x 36" x 3/32" special black mat, 50ft. low voltage wire, chime, transformer and instructions

522-03669

Replacement sensor mat only

522-01215
